ADVANCE

Explore without being tied down. To go anywhere,  
whenever you want, without anything to hold you  
back. The Bailey Advance can fit the whole family  
and everything that comes with it, but is agile  
enough to manoeuvre through country lanes and  
city centres.

Enjoy new touches such as LED over locker  
lighting that complement the Italian designed  
locker doors and 'Eucalyptus' furniture finish, all  
designed to ensure that each and every journey,  
no matter how long or short, is as comfortable  
as can be and with it's brand new cruise control  
feature you'll find it a joy to drive.

ALLIANCE

The all-new Alliance motorhome gives you the  
freedom to go anywhere at any time. Furnished  
with all the comfort and convenience you need,  
it's well-proportioned and agile frame means  
that you can enjoy indulgent afternoons in rural  
paradise or pop into town to get the essentials.

If your time venturing out means you'll be  
soaking up the breathtaking scenery up in the  
mountains or by the coast, find your little bit  
of paradise using the built-in Sat Nav and spend  
more time enjoying the sun under the new  
Fiamma F45S wind-out awning and let its solar  
panel soak up the sun's rays.

Whatever freedom means to you, the Bailey  
Alliance will make anywhere feel closer.

# YOUR **ADVANCE** *your everyday...*

Explore without being tied down. To go anywhere whenever you want, without anything to hold you back. That's the beauty that the Bailey Advance brings you – the liberty to travel to every corner of the country and beyond.

Imagine getting out there and going truly off the map. Whether it's a seaside holiday, city break or you're braving the elements out in the countryside, the Advance is large enough for you to take everything you need, while small enough to manoeuvre through the country lanes and city roads alike.

Once you've enjoyed the great outdoors, there's a great indoors to come back to, warm and welcoming with a fully equipped kitchen and washroom.

## A *pleasure* TO DRIVE

At Bailey we never compromise on comfort. So our motorhome cabs are as comfortable as the living space behind them. Each vehicle in the range is powered by a 2.0 Blue Hdi 130bhp or 160bhp engine, along with a 6-speed manual gearbox. That means powerful performance for the journey and easy handling for you.

This is a cab where you can feel safe and secure, thanks to features such as driver and front passenger airbags, tyre pressure sensors and anti-lock braking system. In addition, it's now more comfortable than ever; cab air conditioning and cruise control, fully adjustable driver and passenger Captain's seats and twin cup holders give you that degree of luxury. Add to that the AL-KO AMC chassis (creating a low centre of gravity for easier handling and more efficient braking) and the Advance, Alliance and Autograph are a true joy to drive.

## A LITTLE BIT ABOUT BAILEY

It's a big *family* adventure that's been going for 70 years!

We're very excited to be celebrating our 70th Birthday. We've come a very long way since 1948 and are delighted to say that we're still a family run business. Needless to say, we're constantly investing in better ways to manufacture the caravans and motorhomes you love so you can create some really special memories. Here's to the next 70 years!

The Bailey journey began in 1948, when Martin Bailey built caravans in his garage in South Bristol. His first caravans struck a chord with holidaymakers across the UK and Bailey became a thriving family-run business.

Since those early days, we've helped tens of thousands of families get out there and create some lasting memories to treasure, and now we're delighted to be celebrating our 70th Birthday!

All these years on, Bailey is still a family business, run by people that are equally as passionate about helping to create the perfect holiday for you.

Through our wealth of experience in caravan production and design, we're inspiring a whole new generation of people to make memory after memory in our vehicles.

CARAVAN HOLIDAYS AS  
MUCH AS WE DO! ”

# TESTED TO THE LIMIT

On the dusty roads of Europe and Asia, the dirt roads of Australia and the snow and ice of the Arctic...  
Our caravans are proven to *perform* whatever the weather.

This year, we took two caravans and a motorhome and drove through 21 countries in 21 days covering some 5,000 miles.

## #bristanbul

We are passionate about the performance of our products, which is why we go to great lengths to ensure that every aspect of their design is thoroughly evaluated before they go on sale. By concentrating on fewer but more significant new product launches we can push our vehicles harder, further and longer during the assessment process. This allows us to continually set industry performance standards.

All new ranges, for example, are subjected to cold chamber testing in temperatures as low as -15 degrees centigrade where, working with our heating system suppliers, we achieve the best possible results in thermal insulation classification.

Full structural evaluations are carried out when required through a series of accelerated life tests at the international renowned Millbrook Proving Ground. This creates conditions far in excess of what a caravan is likely to encounter in its lifetime.

In 2015 we took two Alu-Tech caravans on a 3,500-mile journey through the centre of the Australian Outback.

Simulated track testing is one thing but we believe that nothing actually beats putting your products through their paces yourself in challenging real-life situations. Which is why in 2015 we took two Alu-Tech caravans on a 3,500-mile journey through the centre of the Australian Outback. During the two-week trip they stood up to everything the elements could throw at them and proved they could hold their own in even the toughest conditions.

Buoyed by this success, in 2017, we embarked on another marathon endurance test, this time with two caravans and a motorhome on a 5,000-mile trip to Northern Finland inside the Arctic Circle. The circumstances there could not have been more different from those in the Red Centre of Australia, but

once again they took everything in their stride, proving that they are genuine 'go anywhere' and 'do anything' vehicles.

With two triumphant expeditions under our belt, this year we decided to set a third monumental durability test. Wanting to truly test our vehicles durability, we travelled relentlessly across two continents, achieving a total of 21 countries within 21 days without respite. The vehicles proved more than capable for our epic Intercontinental caravan and motorhome adventure. You can see much more at #bristanbul.

# MANUFACTURING IN BRISTOL

*We're leading the way*

Our on-site replenishment centre.

We're proud to have the UK's only mechanised assembly line.

At Bailey, we are one big family. We have been building Bailey leisure vehicles here in South Bristol since 1948 and are now very much part of the local community. The majority of our employees live nearby and have been with us for a long time (average length of service is actually 12 years). As a result, our workforce possess the necessary skills and experience to successfully manufacture a complex range of caravans and motorhomes in the same plant. All full-time technicians are salaried to ensure everybody working here is focussed on quality as well as quantity.

Whilst a product is only as good as the people behind it, it is important that they have the tools to do the work required. Consequently, over the past twenty years in particular Bailey has invested heavily in its South Liberty Lane production facility, to the extent that it is now widely regarded as one of the most advanced in Europe. Central to this was the installation of the UK's only mechanised assembly line, which improves both the speed and accuracy of the production process.

Not wishing to rest on our laurels however, we have recently taken the bold decision to completely re-develop our existing

14.5-acre site over the next five years to push UK leisure vehicle manufacturing to the next level. The relocation of our Prima Leisure (Bailey parts) operation to North Bristol and our Large Panel Laminating Plant (where we produce the caravan sides, ceilings and floors) to North Somerset means we have cleared the space for building work to begin. In 2016, phase one of the programme was completed with the construction of a purpose-built Replenishment Centre which allows us to house the thousands of components required to create our caravans and motorhomes under one roof.

Our Prima Leisure operation is now located in North Bristol and is (we believe) the best of its kind.

Our Large Panel Laminating Plant has moved to North Somerset.

WE ARE  
*confident...*

...that with this investment, along with the continued support of our loyal workforce, Bailey caravans and motorhomes will remain a familiar sight on parks and pathways across the country for seventy more years .

# ALU-TECH MEANS YOU CAN

The technology that helps create those special *memories*

One of the most important developments in the recent history of leisure vehicle design happened nearly ten years ago when Bailey introduced their patented Alu-Tech construction system. Prior to this basic leisure vehicle design had not changed for three decades and whilst it had served us well in that period it was not without its drawbacks. Consequently, Bailey asked “is there a better way?”

The result of the most comprehensive development programme the industry has ever known, Alu-Tech heralded a completely new approach to bodyshell construction. Using a unique interlocking aluminium framework to clamp the body panels together, Bailey created a shell that was so much more robust and durable than anything that had gone before.

A significant reduction in the number of external joints and fixing points along with the use of timber-free components

in the upper bodyshell panels also provides greater protection against the elements. Whilst thicker, fuller insulated panels, cloaked in impact resistant GRP (Glass Reinforced Plastic) massively improves the thermal performance of the bodyshell making the motorhomes genuine four-season vehicles. And when you consider that all these benefits of ownership have been achieved without a weight or cost penalty you can begin to see why the Alu-Tech construction system is so unique.

- 1. Polystyrene core
- 2. Composite plastic extrusion
- 3. Alu-Tech rail
- 4. Structural fixing bracket
- 5. Alu-Tech rail insulation
- 6. GRP (glass reinforced plastic) outer and inner skin

## How is Alu-Tech better?

- 1. Increased strength and durability...**  
giving you greater protection against the elements to keep you comfortable, safe and secure all year round.

**2. Improved insulation...**  
keeping you warmer in the winter and cooler in the summer allowing you to holiday wherever and whenever you want.

**3. Improved protection...**  
greater resistance to the elements increases the longevity of the vehicle and provides additional peace of mind to the owner.
- 4. Lighter bodysell...**  
making Bailey motorhomes accessible to a wider range of drivers and making it more economic to own.

**5. Better balanced bodysell...**  
makes the motorhome inherently more stable enabling it to take even the most demanding journeys in its stride.

**6. Cost neutral improvements...**  
all of the benefits of Alu-Tech come at no extra cost to the customer.

To date, more than 50,000 Bailey leisure vehicles have been built with this fully patented technology and are currently being used and enjoyed around the world.
